

AORN Global Surgical Conference 2017
Boston Convention & Exhibition Center ~ Boston, MA
Exhibit Dates: April 1 – 5, 2017 | Booth 858

PL Medical is proud to be attending AORN Global Surgical Conference & Expo 2017 in Boston, MA. Our GuideBlade™ product will be available to viewing at the show. Please join us at **Booth 858** to view GuideBlade™ and other exciting products and services that PL Medical offers.

About GuideBlade™:

PL Medical introduces the GuideBlade scalpel for precision incisions for wire-guided catheter insertion. This product integrates seamlessly with standard, over-the-wire insertion techniques.

PL Medical has developed GuideBlade™ technology to help further reduce the incidence of BSI. GuideBlade™ streamlines central line placement and minimizes the disruption of skin integrity. The density of skin flora at the insertion site and interruption of central venous catheter placement technique are major risk factors for CVC related BSI.

Attention to the proper selection of safety scalpel material, selection of cannula size and blade geometry ensures the proper alignment of the blade with respect to the guide wire. GuideBlade™ technology minimizes the size of the skin insertion site and reduce the instances of skin-tags. The technology ensures the integrity of the wire and the sharp safety is maintained.

This technology maintains all the current procedures currently followed by the healthcare providers.
